

## **Policy Statement on Patient Choice**

The Michigan Association of Chiropractors supports Michigan health care consumers in their right to choose and make informed decisions regarding patient care for both the individual and their family and children. No health care procedure is without potential risk. It is essential that patients educate themselves on both the benefits and the risks associated with each procedure in order to properly exercise their freedom of choice in making health care decisions.

The Michigan Association of Chiropractors opposes mandated or compulsory medical procedures of any kind, as they infringe the individual's ability to fully exercise their freedom of choice in health care decisions, without any element of force, fraud, deceit, duress, or other form of coercion.
